## DETAILED ACTION

### *Claim Objections*

Claims 8 and 10-12 are objected to because of the following informalities:

As to claim 8, line 2, "second cooperating features" is unclear because there is no previous recitation of first cooperating features.

Appropriate correction is required.

### *Drawings*

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the first cover means disposed adjacent the means for delivery the developer and positionable in a **first direction** between an open position for delivery of the developer and a closed position for preventing delivery of the developer, the first cover means configured to move in a **second direction different than the first direction** during movement between the open and closed positions (claim 16) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate

changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: There is no antecedent basis in the specification for the first cover means disposed adjacent the means for delivery the developer and positionable in a **first direction** between an open position for delivery of the developer and a closed position for preventing delivery of the developer, the first cover means configured to move in a **second direction different than the first direction** during movement between the open and closed positions (claim 16). In addition, there is no antecedent basis in the specification for "the first cover has been moved in a distance" (claim 17).

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 16 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support of the new limitations, claim 16, of "the first cover means disposed adjacent the means for delivery the developer and positionable in a **first direction** between an open position for delivery of the developer and a closed position for preventing delivery of the developer, the first cover means configured to move in a **second direction different than the first direction** during movement between the open and closed positions" in the originally filed specification.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 16, lines 7-11, "the first cover means disposed adjacent the means for delivery the developer and positionable in a **first direction** between an open position for delivery of the developer and a closed position for preventing delivery of the developer, the first cover means configured to move in a **second direction different than the first direction** during movement between the open and closed positions" is

unclear. How can the first cover means be positionable in a direction that is different between the same positions, an open to a closed positions? It does not make any sense. Also, this is not shown in the drawings nor disclosed in the specification.

Applicant's arguments with respect to claim 16 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

***Allowable Subject Matter***

Claims 1-15 and 17-22 are allowed over the prior art of record.
